

Hi! My name is Heather Fawn Thomason and I listen to Airl every morning and afternoon on my commute to and from work. I listen to this station first and for most because I like the music. The music is how they got my attention. They hooked me with community volunteer spots with the tag line "You can make a difference." These spots don't just tell you to make a difference but they center around actual individuals who have been touched by volunteerism through organizations such as City Rescue Mission. Because of this I have become an active volunteer in my community. This radio station has improved my community by affecting me. I believe the programming that Airl offers will continue to grab the attention of others in my area and improve their day to day life as well. Please, enable stations such as this one to continue broadcasting in Jacksonville Florida. Thanks and have a good day.
